18.- TAKING CARE OF THE ENVIRONMENT

Participants are asked to take the utmost care of the environment when disposing of waste such as drinking cups, bottles, drink cans, plastic for the rain, etc. It is necessary to bear in mind that one simple gesture, multiplied by thousands, could be a serious problem of waste for the natural environment and for the city. All efforts must be taken to use the recipients or containers and in mid-race, leave containers and cups at the refreshment station or in appropriate recipients or, if not, by the wayside as near as possible to the stops.

19.- RECOMMENDATIONS

1. C.D. Fortuna especially **recommends runners to fill the Signs and symptoms questionnaire in [our website](#).**
2. The collection and handover of luggage is a complicated task. Travel or large size suitcases are not accepted. Use a coloured or unusually shaped sports bag or backpack and attach the label tag with the bib number clearly visible to facilitate its identification when it comes to collecting it at the finish.
3. Do not use more drink than necessary, being always mindful of the athletes coming behind, most probably in greater need of liquid. At stations providing cups of water,

if you are not in the practice of running while drinking, it is best to stop for a few seconds.

4. it is important to measure your efforts depending on the route. Better to withdraw in time than regret it later.
5. Do not stop once you cross the finish line, but continue walking to the drinks and luggage area, thus avoiding hazardous crowding.

IAAF regulations will apply in the case of any circumstance not provided for in the preceding regulations.
